

Being a full time Recreational Vehicle traveler I use the XM radio instant traffic all the time . In this time of high gas prices this service provides me more than the over the air radio stations traffic reports . When I travel I need to know the traffic at all times while I am pulling a trailer ,to help not cause my own traffic mess up . I pay for this service willingly and feel that it is a good service . Also I am in a wheelchair and this service helps me keep in touch with the news during this time of a National emergency . I am often in areas of the country that doesn't have good radio service . TV broadcast is out of the question during this time .
Thank you for your time
